Brief Introduction:

The Emergency Fund is a key initiative of TEI, that aims to provide financial support to schools in need during emergencies. The program provides funds to schools facing unexpected situations such as natural disasters, or other emergencies that disrupt the normal functioning of schools.

The main objective of the program is to ensure that schools can continue to provide quality education to their students, even during times of crisis. The program targets schools in disadvantaged communities that lack access to basic resources and are vulnerable to emergencies.

Through the program, we work closely with school administrators to identify their specific needs and provide customized support that meets their unique requirements. We provide funds that can be used for a variety of purposes, including repairing damaged infrastructure, purchasing essential learning materials, and paying for teachers' salaries during emergencies.

In conclusion, the Emergency Fund is an integral part of our efforts to promote education and empower communities through knowledge. It is a small step towards ensuring that schools have the resources they need to provide quality education to their students, even during times of crisis. We will continue to work tirelessly to expand the reach of the program and provide more schools and students with the support they need to succeed.
